LEAST RECENTLY USED PAGE REPLACEMENT TECHNIQUE

The screenshot shows the 'LRU Page Replacement' simulator interface. The browser tabs include 'visual studio code - Search', 'LRU Page Replacement Website', and 'LRU Simulator'. The address bar shows '127.0.0.1:5500/index.html'. The page has a purple header with the title 'LRU Page Replacement' and subtitle 'Interactive OS Simulator'. On the left, a box titled 'What is LRU?' explains the technique. The central 'Run Simulation' box contains two empty input fields: 'Enter pages (e.g. 7 0 1 2 0 3)' and 'Enter frames', followed by a pink 'Run Algorithm' button. The right side features an empty 'Output' box. The footer credits 'Made By Laxmi Mankar'. The Windows taskbar at the bottom shows a temperature of 33°C and the date 26-03-2026.

LRU Page Replacement
Interactive OS Simulator

What is LRU?
LRU replaces the page that has not been used for the longest time. It improves memory efficiency by keeping recently used pages.

Run Simulation

Enter pages (e.g. 7 0 1 2 0 3)

Enter frames

Run Algorithm

Made By Laxmi Mankar

This screenshot shows the same simulator interface after a simulation run. The 'Run Simulation' box now contains the input '3 5 7 9 1 2 4 5 6 3 9 1 0 5 3' in the first field and '3' in the second field. The 'Output' box on the right displays a list of seven steps, each showing the state of the memory frames after a page access. The 'Run Algorithm' button remains visible. The rest of the interface, including the header, 'What is LRU?' box, and footer, remains unchanged.
